

Strategic Planning Consulting

There are actually three levels of planning:

- ❑ Strategic (ends, consequences, and results)
- ❑ Tactical (best way to get there)
- ❑ Operational (implementation and critique).

Strategic Planning is utilized when organizational objectives are added, modified or deleted. This is a facilitated process that occurs at the executive/owner level that helps organizations and/or groups align their resources against the master plan to maximize productivity. As groups develop a strategic plan, it can create "ownership" of the plan & goals, direction, group cohesion and action! The process can also help employees develop individual ownership of your organizational/group goals.

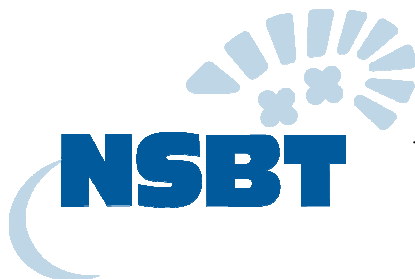

Ways NSBT can assist your company:
