

Understanding Your Leadership Style (DISC®)

Successful leaders understand how important it is to realize how as a leader you may be perceived and how others may best be motivated by your behavior style. Why is understanding it all so critical to our productivity and success? These questions and more are addressed in this thought-provoking, skill-building seminar designed to increase awareness of our strengths as well as our personal growth opportunities. Understanding Your Leadership Style is focused very specifically on the challenges that leaders face in regards to vision, setting the culture, motivation and the overall success of the organization and their affect on that.

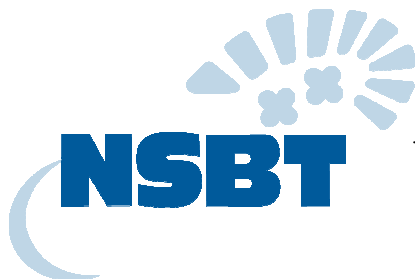

In this session, leaders learn to identify and understand behavior styles – theirs and others – by completing the On-line DISC® Classic 2.0 assessment by Inscape Publishing. By analyzing their own profiles, participants prepare to explore the most effective ways to relate to others and communicate in light of identified behavior styles.

Sample 3-hour Session:

- Participants complete the on-line profile prior to the session
- Understand a leaders role in interacting effectively with other behavioral styles
- Successful strategies for working together and increasing productivity
- Create strategies for effective ways to motivate using different behavior styles
- How to strengthen communication by using different methods based on differing behavioral styles.
- Develop a personal action plan to measure effectiveness
